

CREDOS

The
Biotherapeutics
Consultancy

CREDOS is the leading source of specialist technical expertise & consulting services for antibody & protein-based therapeutic discovery & development.

Founded in 2015, our consultants share very established track records in biotherapeutic drug discovery projects 'at the coalface', from project set-up to regulatory filing.

Whether you are a start-up life science company, biotech or large pharma organisation, CREDOS is committed to support clients working in this specialist sector with world-leading expertise across all disciplines, when and for how long that support is needed.

WHY CHOOSE CREDOS?

Many of the recent advances in medicine have come from antibody-based drugs.

Credos is the only provider of the nose-to-tail specialist skills required to progress biotherapeutics from early target identification through to late stage development.

We manage the risk and cost of outsourcing for our clients by only working with experts who satisfy Credos' high standards.

Our experienced team of consultants share our quality-driven ethos to help make our clients successful.

OUR CONSULTING SERVICES INCLUDE:

- Strategic leadership and technical expertise across all disciplines supporting the discovery & development of biotherapeutics.*
- Development plans for a range of biotherapeutic projects including antibodies, recombinant proteins, novel-scaffolds, biosimilars, and where alternative routes of administration are needed.
- Independent experts offer tailored solutions to address bespoke project needs, including derailed projects.

- Virtual teams of experts to support and lead more complex or challenging projects including project management.
- Due diligence opportunity/risk assessment.
- Life cycle management of biologics portfolio.
- Training to address gaps in drug discovery knowledge within your organisation, tailored to your specific needs.

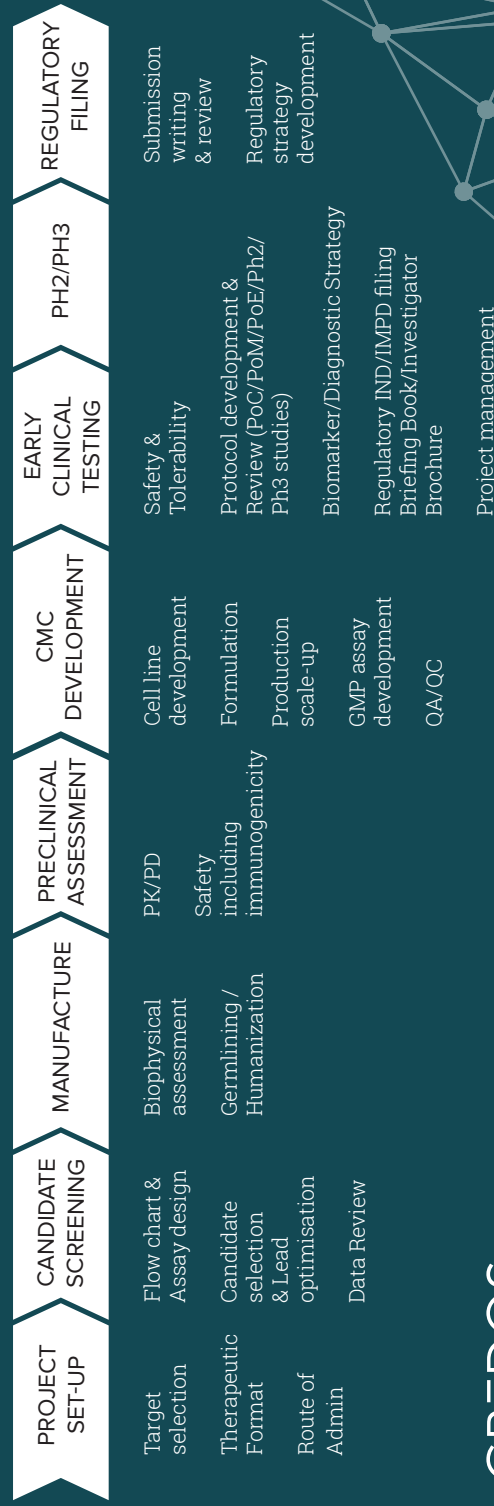

THE CREDOS CONSULTANT NETWORK

CREDOS is the leading portal bringing together multidisciplinary experts, each with a track record of successful biotherapeutic drug discovery and development. With at least 10-15 years' hands-on experience in a wide range of projects, they each bring a pre-emptive approach to identifying and providing solutions to potential hurdles.

Our consultants are leading experts in their respective fields and have contributed to numerous scientific publications and reviews, industry white papers, and Advisory panels.

They demonstrate a collegiate approach, able to work together as an effective team as well as reference key experts in the biotechnology field.

*CREDOS expertise across all disciplines supporting biotherapeutic drug discovery.
